

SUBJECT KNOWLEDGE BOOSTER (CLASS TESTS)

Subject knowledge boosters (SKBs) will be starting from this semester wherein the students will get regular practice and will have preparation for their final GTU examination. The system to be followed for these class tests will be as follows:

1. SKB will be taken for every subject once in a month in weekly class test slot. For subjects not shown in class test schedule or having any type of clashing must be conducted by concerned subject teacher in any convenient slot of the month and students must be informed about the same in advanced. Also make sure that the changes should be formally informed to all involved faculty of the respective class.
2. The results of these SKBs should be submitted to the departmental class coordinator of first year by Thursday of the last week of the month.
3. Test will be of 20 marks.
4. If a student fails/ remains absent for the test, he/she has to write the test five times and again give the test. Still if he/she fails then the punishment will increase by five times every time.
